Professional Summary

Computer Science undergraduate with hands-on experience developing full-stack web and mobile systems in production environments, impacting 6K+ monthly users. Proficient in C++, Java, Python, JavaScript, Node.js, React, Flutter, MongoDB, PostgreSQL, Docker, and CI/CD pipelines.

Education

VIT Bhopal University

BTech in Computer Science, CGPA: 8.10

Bhopal, Madhya Pradesh

Expected May 2027

Technical Skills

Languages & Frameworks: C++, Java, Python, JavaScript, Go, SQL | Node.js, Express, React, Flutter, Next.js

Databases & DevOps: PostgreSQL, MongoDB, Firebase, Redis, GraphQL | Docker, Git, Github Actions (CI/CD), JWT Auth

Concepts & Practices: OOP, System Design Fundamentals, REST APIs, Unit Testing, Agile/Scrum, Responsive Design, WCAG Accessibility, FCM/GPS Integration,

Experience

AI Engineer @mytribe, Bengaluru

Jan 2026

- **Integrated AI-driven features** into the marketplace platform to enhance user discovery, intelligent service matching, and automated provider onboarding, improving platform engagement and recommendation accuracy.
- **Developed scalable full-stack architecture** (front-end & back-end) to support AI model deployment and real-time data pipelines, collaborating directly with founders and the core engineering team in a founding-stage startup environment.
- **Engineered CI/CD pipelines and cloud infrastructure** to streamline AI model deployment, ensuring system reliability, reproducibility, and rapid iteration across the software development lifecycle.

Software Developer Intern — Indian Oil Refinery, Haldia

May 2025 – Jun 2025

- Engineered a **computer vision** attendance system using **Python + OpenCV** to auto-detect **employee vehicles** at entry gates — eliminated **100% manual reconciliation for fuel allowances**.
- Designed **SQLite schema** with indexed vehicle-employee mapping; **optimized query performance** for **1800+ daily records** → **slashed processing time by 65%**.
- Containerized the **pipeline using Docker** — enabling consistent, scalable deployments across 3+ refinery terminals.

Mobile App Developer Intern — Outfly, Gurgaon

Jan 2025 – Mar 2025

- Delivered a production ready **Flutter** driver app (100+ DAU) for DayKart's gig delivery ops — features: order acceptance, GPS verification, in-app payments.
- Integrated **real-time GPS tracking + turn-by-turn navigation** via **REST APIs** — improved **ETA accuracy by 25%**, curtailed **route deviation by 18%**.
- Implemented **Razorpay SDK** with client-side validation + webhook security — enabled seamless daily cash-outs with zero transaction failures.

Selected Projects

DIY Analytics — Self-Hosted Web Analytics

[Live Demo](#)

- Created a **lightweight, self-hostable** analytics platform rivaling Google Analytics — **deployable in 3 easy steps**.
- Architected a **Next.js dashboard** powered by **GraphQL, REST APIs, and MongoDB**; boosted throughput using **Redis** caching and **rate limiting**.

ScreenREC — Simplest screen recorder

[Live Demo](#)

- Developed a browser-based screen recorder with **JavaScript, Pug and SCSS** — serving **>10K monthly active users**.
- Ranked **#5 on Product Hunt**; garnered **180+ GitHub stars**.

PhisGuard — Anti-Phishing Mobile App + Extension

[Live Demo](#)

- Trained and deployed an **ML-powered** phishing detector (**Python + Scikit-learn + Gemini, 91% accuracy**), integrated with **VirusTotal API**.
- Presented solution at MP Police Cyber Hackathon — awarded **“Public Impact in Cyber Safety.”**

Achievements

- 6× Hackathon Winner — **Devfest'23, HackSquad'24, DUHacks, MP Police Cyber Hackathon**
- Received **Top Mentor award @GirlsScript Summer of Code'24** — Guided **50+ student** contributors
- GDSC Lead, VIT Bhopal — Organized **6+ technical workshops** (Flutter) for **200+ students**; grew chapter by **3x**
- LeetCode: 50+ problems | Codeforces: **882+ rating** | CodeChef: **1288**
